Form K

Solving One-Step Equations

Define a variable and write an equation for each situation. Then solve.

17. Bradley has a goal to work 28 hours each week at the pizza shop. So far he has worked 12 hours. How many more hours does he need to work to meet his goal?

18. Sheree is 4 times as old as Benjamin. If Sheree is 72 years old, how old is Benjamin?

Solve each equation. Check your answer.

19. $-8h = 26$

20. $-\frac{3}{5} = \frac{1}{10} + q$

21. $n + 3\frac{2}{3} = 5\frac{7}{9}$

22. $-9w = 6.3$

23. $5.8 = -4.5 + z$

24. $\frac{d}{5} = -\frac{3}{10}$

25. A youth club is taking a field trip to a community farm. 27 members attended the trip. The total cost for the club was \$148.50.

a. Write and solve an equation to determine the cost for each person.

b. The farm brought in \$1512.50 that day including what they received from the youth club. Write and solve an equation to find the number of people that visited the community farm that day.
